Hywel Dda University Health Board Foundation Programme Year 1

Updated: September 2020

Welcome to West Wales

West Wales provides a wonderful lifestyle opportunity, each of our major sites in Hywel Dda are in coastal areas with beautiful beaches and spectacular mountains within easy reach. Exciting leisure pursuits such as surfing, mountain biking, fishing, sailing, hiking and walking are all available in this locality, famous for its outstanding natural beauty.

The Health Board serves a total population of around 385,615 throughout the counties of Carmarthenshire, Ceredigion and Pembrokeshire.

Working at Hywel Dda

University Health Board

The Health Board links with Aberystwyth, Swansea, Cardiff and Bangor Universities, as well as having a good working relationship with the National Library of Wales. Many of our Consultants are affiliated Lecturers, Senior Lecturers and Associate Professors.

Knowledge and Library Services

Hywel Dda University Health Board Library & Knowledge Services offer a wide range of resources, both print and online, and services to all Health Board Staff, Trainees and Students on placement.

Each Library is managed by a qualified Librarian and our friendly and knowledgeable staff are here to support your information needs for patient care, education, quality improvement and research.

Carmarthen

Carmarthen is an attractive town set on the banks of the River Towy with stunning landscapes and scenery, nestled between Pembrokeshire and the Gower Peninsula. Explore the idyllic coastline of Carmarthen Bay in the west, the beautiful Brechfa Forest at the centre, and the mountains of Brecon Beacons National Park in the east. Discover historic towns such as Laugharne, which inspired the work of Welsh poet, Dylan Thomas and explore the beautiful National Botanic Garden of Wales.

Glangwili Hospital

Glangwili General Hospital, located in Carmarthen, is the largest of the four main hospitals in Hywel Dda University Health Board. The hospital provides emergency medicine, general surgery, trauma and orthopaedics and general medical services. Diagnostic and therapies, radiology, midwifery, woman and children's services are also available here.

Glangwili hospital also provides:

- A purpose-built Emergency Unit for emergency admissions.
- The Clinical Decisions Unit providing the highest standard of care for acutely sick patients
- A large modern Adult Critical Care Unit
- Stroke Unit with a dedicated stroke team
- Core cardiac services for the population of Carmarthenshire
- Gastrointestinal bleed services for the southern area of the University Health Board.

Transport Links

Carmarthen offers excellent transport links with close proximity to the M4. There are good road and rail links to Pembrokeshire in the west and Cardiff and England to the east.

Hospital Provided Accommodation

All Foundation Doctors in Wales are offered free hospital accommodation for the duration of their Foundation Year 1.

In the unlikely event that there is not accommodation available, you will be able to claim expenses for this period instead.

Below we have briefly outlined the accommodation that is available within this Health Board:

- The F1 doctor's accommodation is conveniently located on the Glangwili hospital site, in close proximity to the Medical Education Centre.
- All Foundation doctors have access to the Doctor's Mess which has Sky TV, Wifi, pool table and a kitchen area.
- Single rooms are provided, with some flats for married accommodation which may be available to rent, subject to availability.
- There is a carpark for residents' use on the hospital site.
- The Accommodation Officer is Anne Rice (anne.rice@wales.nhs.uk)

Rotations – Master List

August 2021 to July 2022

The Programmes we have to offer are summarised below and detailed on the following pages. There are three vacancies per programme (A, B and C) which create the listed placements each in a different order.

F1 posts at Glangwili General Hospital

(Posts based in Prince Philip Hospital are marked with *)

Important Information

The placements and post descriptions provided are intended as a guide to inform applicants only. This does not form part of an employment contract and the Health Board reserves the right to alter any placements in line with requirements.

Programmes can change at short notice and banding may be amended. Please see the Wales Foundation School website for confirmation of any changes to our Programmes.

The following posts are located at Glangwili Hospital, Carmarthen. Some rotations are at Prince Philip Hospital, Llanelli as indicated.

Placement Details

General Medicine / Gastroenterology	Prince Phillip Hospital, Llanelli
Programmes:	FP15A
Band 1B 40%	Rota is 1:20
<p>The trainee will have the opportunity to have exposure to, and be involved in the active management of a wide range of luminal and hepatology related conditions that are seen as an in-patient in Prince Phillip Hospital including complex inflammatory bowel disease, Decompensated liver disease, Gastrointestinal malignancies and advanced nutritional related pathologies. The trainee will benefit from regular consultant ward rounds and bed side teaching that will build knowledge and clinical reasoning. All members of the team are encouraged to seek out educational opportunities in particular attending outpatients to both observe and see patients themselves. Specialist clinics run regularly in PPH including complex IBD, Liver disease comprising of viral hepatitis and post liver transplant follow up alongside general gastroenterology referrals.</p> <p>There will also be an opportunity to attend the endoscopy department to observe both Upper and lower Gastrointestinal endoscopy which will include therapeutics, and all trainees are expected to complete the attachment being competent in performing abdominal paracentesis.</p> <p>Alongside their usual ward duties the junior doctor will also be part of the general medical rota and have the opportunity to see acutely unwell medical patients being admitted to the acute medical assessment unit while being a part of the Medical emergency Team (MET) and attending acute stroke thrombolysis calls.</p>	
Educational Meetings:	<p>Daily Consultant Ward Rounds</p> <p>Weekly F1 Teaching Med Meeting</p> <p>Monthly Whole Hospital Audit Meetings held regularly</p>

Emergency Medicine	Glangwili General Hospital, Carmarthen
Programmes:	FP15B
Band 1A	Rota is 1:3
The assessment and management of both minor and major presentations to the Emergency Unit under on-site Clinical Supervision. Trainees will be involved in RCEM audits, care of children and Cognitive Assessment in the Elderly.	
Educational Meetings:	<p>Weekly F1 teaching Emergency Department teaching – 3 hours Three hours bleep free teaching every Wednesday afternoon, 2pm – 5pm which usually consists of three one hour sessions covering the Emergency Medicine curriculum.</p> <p>Monthly Whole Hospital Audit Meetings held regularly</p>
Educational & Clinical Supervisors	Dr Lakshman Nangalia

Rheumatology	Prince Philip Hospital, Llanelli
Programmes:	FP15C
Band 1B – 49%	Rota is 1:7
<p>This post will introduce the doctor to the full range of rheumatological disorders through attending 4 outpatient clinics per week, the rheumatology day unit and seeing ward referrals with one of the 3 rheumatology consultants. There will be the opportunity to develop specialty specific procedural skills such as therapeutic intramuscular, intra-articular injections, and soft tissue injections depending on the preference of the doctor. Blood results from clinics will be the responsibility of the doctor to check daily and any unexpected abnormal results can be discussed with the clinician who last saw the patient in clinic.</p> <p>There will be time to become familiar with drug counselling and monitoring, pre-screening investigations for DMARDs and biologic therapies and to develop knowledge about chronic disease management. IT skills can be developed through the use of our electronic patient record and communication skills, by the doctor seeing patients in clinic and then presenting their findings to the consultant who will then see the patient with the doctor. There will be time during the week for a quality improvement activity, or case study to be done. There is an on call medical rota commitment and engagement with weekly junior doctor teaching, journal club and grand rounds will be encouraged.</p>

ENT	Glangwili General Hospital, Carmarthen
Programmes:	FP22B
Band 2B 50%.	Rota is 1:5
<p>The ENT department in West Wales provides the full range of ENT services to a widely dispersed largely rural population. There are three FY2 doctors and 1 FY1 doctor working with a core surgical trainee and GPST at first on-call level. The junior tier is supported by six registrar level doctors including one higher surgical trainee in ENT, and six consultant ENT surgeons. We have a very strong team working ethos and all doctors work closely together and provide support for colleagues as needed. Duties consist of management of elective and emergency inpatients on the adult ENT and paediatric wards. The on-call rota for F2 doctors covers emergency ENT admissions until 8:30pm weekdays and weekends, with cross-cover for ENT and urology admissions overnight. The F1 doctor gains experience in managing general surgical admissions on-call.</p> <p>Our department is well staffed with junior doctors which allows ample opportunity for foundation doctors to attend outpatient clinics and spend time in the operating theatre. In addition to gaining the generic competencies required of all doctors we encourage our trainees to improve their experience of outpatient management of common ENT conditions, and many Foundation doctors have been able to start a logbook of surgical cases they have been involved in. This time in theatre stands them in good stead when applying for further training jobs. A significant proportion of our patient group is aged less than 18 which provides paediatric exposure for those doctors considering a career in paediatric medicine or general practice.</p>	
Educational Meetings:	<p>Weekly F1 Core Curriculum teaching. ENT Department teaching Teaching on ENT and urology emergencies at the start of their placement to prepare for on-call commitments. On-going educational support for doctors in their daily work. We have medical students from Cardiff and Swansea medical schools on attachment and this provides an opportunity for foundation trainees to develop their own teaching skills. We fully support the attendance of our foundation doctors in the regional foundation training days and encourage them to complete ALS, ILS and, where relevant PSA courses. The ENT department also has developed close links with other departments and primary care for the purpose of arranging taster days in other specialties should this be required.</p>

General Medicine / Respiratory	Prince Phillip Hospital, Llanelli
Programmes:	FP23A
Band 1B 40%	Rota is 1:20
<p>The Ward 3 patients are split between the three Respiratory Consultants, taking into account the sub specialty interests, but the team is shared and looks after the whole ward. Within the role you will be involved in managing patients with respiratory failure, including non-invasive ventilation on the ward. You will also be managing patients with pleural disease including a variety of chest drains. Competency training in NIV is led by our senior respiratory nurse specialist. Pleural procedures should be learned in the skills lab in postgraduate department, and training is led by our registrars and teaching fellows. When time permits junior doctors are encouraged to attend pleural clinics on Monday afternoons to have the opportunity to learn pleural aspiration and chest drain insertion skills</p>

General Medicine / Gastroenterology		Glangwili General Hospital, Llanelli
Programmes:	FP06B	
Band 1B 40%	Rota 1:22	
<p>This post offers the opportunity to be part of a friendly and dynamic team of gastroenterology consultants, Dieticians and specialist nurses. The trainee will have the opportunity to have exposure to, and be involved in the active management of a wide range of luminal and hepatology related conditions that are seen as an in-patient in Prince Phillip Hospital including complex inflammatory bowel disease, Decompensated liver disease, Gastrointestinal malignancies and advanced nutritional related pathologies. The trainee will benefit from regular consultant ward rounds and bed side teaching that will build knowledge and clinical reasoning. All members of the team are encouraged to seek out educational opportunities in particular attending outpatients to both observe and see patients themselves. Specialist clinics run regularly in PPH including complex IBD, Liver disease comprising of viral hepatitis and post liver transplant follow up alongside general gastroenterology referrals. There will also be an opportunity to attend the endoscopy department to observe both Upper and lower Gastrointestinal endoscopy which will include therapeutics, and all trainees are expected to complete the attachment being competent in performing abdominal paracentesis. Alongside their usual ward duties the junior doctor will also be part of the general medical rota and have the opportunity to see acutely unwell medical patients being admitted to the acute medical assessment unit while being a part of the Medical emergency Team (MET) and attending acute stroke thrombolysis calls.</p>

Community Sexual and Reproductive Health LIFT		Glangwili General Hospital, Carmarthen
Programmes:	FP115B	
Band: Unbanded	<i>No on-call, all work within 9-5pm</i> *Friday in General Practice	
<p>Sexual and Reproductive Healthcare follows a 'life-course' model of health that does not only cover the provision of contraception and the prevention and treatment of sexually transmitted infections. It includes supporting sexual well-being, no matter an individual's background or sexual orientation, and includes the planning of families.</p> <p>Hywel Dda Sexual Health services are provided across three counties from a number of community and hospital sites. Following CV-19 we have also introduced a telephone triage system and new technology to support video consultation.</p> <p>You will have an opportunity to shadow within a variety of clinics (ie. contraception, sexual health, psycho-sexual, abortion services) both face-to-face and using VC/telephone, developing the key skills in sexual history taking and examination. There is a structured training plan throughout the placement with weekly tutorials and protected time for your own self-directed learning.</p>		
Educational Meetings:	<p>Weekly F1 Teaching</p> <p>Every Tuesday afternoon there is designated Educational opportunities within the department (clinics closed for the afternoon). F1 will be encouraged to participate and attend all in-house training.</p> <p>We also have a designated timetable of tutorials for the F1 which is a combination of self-directed and small tutorials (socially distanced or Microsoft Teams) covering essential aspects of SRH and which is accompanied by a log-book the F1 will complete during their post.</p>

General Practice All LIFT posts	Community
Programmes:	LIFT Programme FP115A, FP115B 7 FP115C
Unbanded. **Trainees work on Fridays in General Practice	
<p>The concept behind the LIFT programme for Foundation 1 trainees is to</p> <ul style="list-style-type: none"> • Be part of a primary care team for 1 day a week for the whole of their foundation Year 1. The remaining time of the week will be spent in a secondary care setting • Experience of wide ranging acute and chronic conditions which occur in the community and occasionally need referral to secondary care • Experience undifferentiated clinical conditions • Learn to deal with uncertainty in a supportive clinical environment • Have a GP educational supervisor for the whole year, with regular weekly teaching • Appreciate the complexity of primary care <p>LIFT training is NOT to train or produce General Practitioners, but to give support and encouragement of the LIFT trainee to develop generic skills and provide the confidence to competently deal with common clinical conditions.</p> <p>Foundation Year 1 trainees will have the opportunity to integrate their medical school learning within a primary and secondary care setting, with an educational supervisor (as a critical friend) encouraging the trainee with their professional development in a structured manner.</p>	
<p>Educational Meetings:</p> <p>Clinical activities that may be considered educational</p> <ul style="list-style-type: none"> • Time spent in activities relating to work-placed based assessment and supervised learning events. • Time spent analysing video recordings of consultations, such as Mini-CEX exercises, case-based discussion (CBD) where time is set aside for this purpose. • Participation in clinics run by other GPs – such as minor surgery lists, joint injections, chronic disease clinics (especially where direct supervision is required in the process to get formal verification of procedural competences). <p>Non-clinical activities suited to educational sessions</p> <ul style="list-style-type: none"> • Locally organised educational events, e.g. foundation-specific educational programme run by the deanery or trust, including "half-day release" or "day-release" sessions. • Structured and planned educational activities, such as tutorials delivered in the GP practice. • Primary care team meetings. • Educational supervisor meetings and other educational reviews. • Audit/QIP and research in general practice.
