# Cardiff and Vale University Local Health Board Foundation Programme Year 2 (2022-2023)

# What makes Cardiff so great!

Cardiff is a unique city that offers all that is expected of any modern capital city, and boasts an enviable quality of life. Cardiff's residents believe it is one of the best cities in Europe to live and work in.

Compact, multicultural Cardiff dances to its own beat, with abundant cultural and historical sights, independent businesses and a friendly atmosphere. - Amy Pay, Lonely Planet Writer

Cardiff is a "city of parks" with more green space per person than any other main UK city and has been described as the epitome of cool by the Lonely Planet guide. There is a vibrant night life including the hustle and bustle of St Mary Street and the relaxed restaurants and bars of Cardiff Bay.

The City offers a mix of boutique stores found in the varied Victorian arcades coupled with larger department stores. Cardiff is home to world class venues and international events; the Principality Stadium is recognised across the world, the Sophia Gardens Stadium hosts international cricket including the Ashes and Cricket World Cup whilst the Wales Millennium Centre has established a worldwide reputation as an excellent arts and cultural venue.

Cardiff enjoys a healthy residential market, yet the cost of housing is lower than many other parts of the UK. Schools offer a high standard of education and facilities. The UHB's Accommodation Department will offer help and support to new trainees seeking to relocate to the City. Surrounded by areas of outstanding natural beauty, with the Brecon Beacons National Park, Swansea Gower Peninsula and the picturesque Vale of Glamorgan all nearby, Cardiff really does have it all.

# Why work in Cardiff & Vale UHB?

The UHB has a well-earned reputation as a centre of excellence for clinical care, medical education and research. Established in 2009, following the reorganisation of health services within Wales the UHB is one of the largest and most diverse healthcare providers in the UK. There are strong links with the Wales College of Medicine and Cardiff University.

## Working for CAV UHB

It is important to the UHB that all staff are as happy as possible with their working arrangements. Therefore there is a commitment to improving the working environment and enabling all staff to strike a healthy work-life balance.

The Social Club on the UHW site provides facilities for relaxation and exercise with gym, pool and racquet sports available. There is an active doctor's mess at both UHW and UHL, with widescreen television, comfortable seating and facilities for refreshments. Accommodation is available if required at both the UHW and UHL sites.

## The Foundation Programme in CAV UHB

The majority of foundation posts are based either at the University Hospital of Wales (UHW) or University Hospital Llandough (UHL). On both sites there are Medical Education Centres with helpful and knowledgeable staff readily available to provide support and advice throughout your Foundation years.

There is a comprehensive induction programme organised for the start of your post and the Foundation Programme Directors meet with all foundation trainees to welcome you to the UHB and ensure that you are supported at this stage of your career. There are regular opportunities for feedback and should there be any difficulties encountered during your posts it is easy to obtain help. The teaching programme has always received positive feedback and allows plenty of time for you to learn. It is designed to cover all elements of the Foundation Programme Curriculum and is continually being evaluated in order to improve the standard of education provided.

## University Hospital of Wales (UHW)

The University Hospital of Wales is a large teaching hospital situated within the city of Cardiff. Working here as a foundation trainee will enable you to learn from some of the foremost clinicians in their fields within a culture of innovation, education and research. The hospital provides secondary care to the population of North and East Cardiff and tertiary level care in nephrology, neurosciences, haematology, paediatrics and neonatology, cardiothoracics and critical care. Most of the posts are busy and provide good experience in developing clinical assessment and decision making skills within a supportive team environment.

The Medical Education Centre at UHW is based in the purpose built Cochrane Building that is also home to Cardiff University Health Library and Medical School. The Centre has excellent educational facilities and an active postgraduate education programme.

Departmental meetings are highly valued by trainees both as opportunities to learn and to gain experience in presenting their own work.

The strong links with Cardiff University mean that there are good opportunities for research and further academic development if wished. There are a number of academic foundation posts which are specifically aimed at encouraging teaching and research activity during the programme.

## University Hospital Llandough (UHL)

Located at Penarth in the Vale of Glamorgan, the University Hospital Llandough provides medical secondary care services to West Cardiff and the Vale of Glamorgan. It is also home to the Cardiff and Vale Orthopaedic Centre (CAVOC), which provides elective orthopaedic services and tertiary respiratory services including cystic fibrosis service. The hospital is supported by excellent lung physiology, state of the art thoracic radiology and pathology services. A new endoscopy unit has recently opened which provides state of the art facilities for gastroenterology endoscopic procedures and interventional respiratory medicine including advanced bronchoscopy techniques and thoracoscopy.

The Medical Education Centre at UHL houses excellent library and educational facilities with an active postgraduate education programme and newly developed “simulation” suite.

# Barry Community Hospital & St David's Hospital

Barry Community Hospital was opened in 1995 it provides a minor injuries unit, in-patient care and community services including clinics, day hospitals, radiology and phlebotomy services.

St David's Hospital was opened in 2002 and is based in the Canton area of Cardiff. There are in-patient facilities for older people, community children's services and a variety of specialist clinics.

Below are the post descriptors for the Foundation Year 2 posts within Cardiff and Vale UHB. Over the last 2 years many of our services have relocated, or the nature of the service provision has changed. As a consequence it has been necessary to modify rotations and review the on-call commitments; where we anticipate changes are most likely this is indicated in the descriptor.

They are actively being reviewed therefore please be aware there may be some further changes.

## **LIFT posts in F2**

There are flexible opportunities within the F2 LIFT. Upon appointment trainees will be asked to rank the available preferences. While we will do our best to accommodate we cannot guarantee any specific allocation.

# Rotations

August 2022 - July 2023

- Rotation 1:** Emergency Medicine - Cardiology - Respiratory Medicine
- Rotation 2:** General Medicine/Stroke - Emergency Medicine - General Medicine/Gastroenterology
- Rotation 3:** Neurology/Rehab Medicine - General Medicine/Geriatrics - Obstetrics & Gynaecology
- Rotation 4:** General Practice - General Surgery/Upper GI - Pharmacology & Therapeutics
- Rotation 5:** General Practice - Renal Medicine - Cardiology
- Rotation 6:** Acute & General Medicine - Obstetrics & Gynaecology - General Medicine/Geriatrics
- Rotation 7:** Neurological Rehab & Neurosciences - Anaesthetics - General Medicine/Geriatrics
- Rotation 8:** Obstetrics & Gynaecology - ENT - Community Paediatrics
- Rotation 9:** Orthopaedic Surgery - General Surgery/HPB - Emergency Medicine
- Rotation 10:** General Surgery/Endocrine - Respiratory Medicine - Emergency Medicine
- Rotation 11:** Orthopaedic Surgery - General Medicine/Diabetes & Endocrine - Emergency Medicine
- Rotation 12:** General Paediatrics - Emergency Medicine - General Surgery/Vascular

- Rotation 13:** Anaesthetics - General Surgery/Colorectal - General Practice
- Rotation 14:** General Practice - Obstetrics & Gynaecology - General Surgery/Vascular
- Rotation 15:** General Psychiatry – Palliative Medicine - Orthopaedic Surgery
- Rotation 16:** General Adult Psychiatry - Haematology - Cardiac Surgery
- Rotation 17:** Dermatology - Cardiology - General Surgery/Colorectal
- Rotation 18:** General Surgery/Vascular - Acute Medicine - Urology
- Rotation 19:** Orthopaedic Surgery - General Surgery/Colorectal - Renal Medicine
- Rotation 20:** Orthopaedic Surgery - General Surgery/Breast - General Paediatrics
- Rotation 21:** Obstetrics & Gynaecology - ENT - Emergency Medicine
- Rotation 110 Academic:** Emergency Medicine - Microbiology/Infectious Diseases - Intensive Care Medicine
- Rotation 111 Academic:** Nephrology - Emergency Medicine - Anaesthetics
- Rotation 115 LIFT:** General Medicine/Gastroenterology - Poly Trauma Unit – General Practice

ROTATION 1		Educational Meetings
<b>Emergency Medicine</b> University Hospital of Wales <a href="#">Band 1A</a>  Educational Supervisor <b>Dr K Nakirikanti</b> Clinical Supervisors <b>All EU Consultants</b>	<p>The Emergency Unit experience includes the whole breadth of adult and paediatric patients presenting from relatively minor injuries to critically unwell victims of major trauma. We also see the medically unwell and those suffering mental illness.
