

## Dental Teaching Unit – Port Talbot Resource Centre

- We would like to take this opportunity to welcome you to the Dental Teaching Unit (DTU). The DTU is located in the Port Talbot Resource Centre in Baglan, and has been providing NHS dental care since 2010.
- The Unit consists of 6 dental Surgeries with modern equipment and facilities including rotary endo, OPG and SOE patient management software.
- The Unit forms part of a Dental suite comprising DTU, Community Dental Services and Restorative Dental Department. We work closely with these other services to provide shared care for patients and giving our DFTs exposure to other services.
- You will be supported by a Clinical Lead (Elizabeth Samways), and experienced Educational Supervisors (Anne Marie Earle and Patricia Moreira).
- Business manager (Debbie Lamin) and experienced team of dental nurses and reception staff.
- All surgeries are on ground floor and ambidextrous.
- You will have the opportunity to treat a wide range of patients and provide in hours access provision.
- We also have an excellent clinical skills lab available for you to develop skills and practice new techniques.
- Good location if you would like to live in Swansea or Cardiff.
