

Glan Clwyd Hospital

Foundation Year One and Two Programmes

Working at Betsi Cadwaladr University Local Health Board

Health Board is the largest health organisation in Wales, providing a full range of primary, community, mental health and acute hospital services for a population of around 676,000 people across the six counties of North Wales (Anglesey, Gwynedd, Conwy, Denbighshire, Flintshire and Wrexham) as well as some parts of mid Wales, Cheshire and Shropshire.

The Health Board employs around 16,500 staff and has a budget of around £1.2 billion. It is responsible for the operation of three district general hospitals (Ysbyty Gwynedd in Bangor, Ysbyty Glan Clwyd near Rhyl, and Wrexham Maelor Hospital) as well as 22 other acute and community hospitals, and a network of over 90 health centres, clinics, community health team bases and mental health units. It also coordinates the work of 107 GP practices and NHS services provided by North Wales dentists, opticians and pharmacies.

Glan Clwyd Hospital (Ysbyty Glan Clwyd)

Glan Clwyd Hospital is located in an area of recognised natural beauty with Snowdonia, stunning pristine beaches and enchanting castles all nearby. The local area offers a wide variety of lifestyle and family options, and for those keen to maintain ties further afield, the area has excellent transport links including fast direct trains to London. The cities of Chester, Manchester, and Liverpool are within In addition, the hospital and health board has excellent academic links with The University of Bangor, Glyndwr University, as well as close links with medical schools in Cardiff, Swansea, Liverpool and Manchester. There is a very active programme of Medical and Dental Education at both Undergraduate and Postgraduate levels. The hospital works closely with Health Education and Improvement Wales to provide high quality education and training, meeting the requirements of these regulatory bodies while maintaining the Health Board's high standards of patient care. There are excellent opportunities for the right candidate to support the further development of education and training

A multi-million pound development of all areas including wards, theatres and outpatient areas provides a new outlook and environment for doctors starting at the hospital. Recent additions have also included the Emergency Quadrant and North Wales Cardiac Centre.

The hospital offers a variety of specialist areas to further your career, being home also to the North Wales Cancer Centre. It recently introduced a clinical fellowship Programme for working in PHEMS, involving time spent in Critical Care here and also working with EMRTS on the Wales Air Ambulance at Caernarfon.

Postgraduate centre

The Postgraduate Department operates from the Education Centre located at the front of Glan Clwyd Hospital and strives to provide a central point of reference and support for all junior doctors at the different stages of their career. All members of the department contribute different aspects and aim to provide a rounded educational and pastoral service postgraduate centre.

Postgraduate centre contacts:

Dr Eve Blakemore – Foundation Programme Director - Eve.Blakemore1@wales.nhs.uk

Mrs Deryn Evans, Medical Education Manager: deryn.evans@wales.nhs.uk

Mr Steve Holman, Doctors Welfare Officer: stephen.holman@wales.nhs.uk

Mrs Elaine Hughes, Foundation/Postgrad Co-ordinator: elaine.hughes2@wales.nhs.uk

Mr Adam McKenna, Intrepid/Postgrad Co-Ordinator: adam.mckenna@wales.nhs.uk

Endorsement from Dr Eve Blakemore (Training programme Director)

The foundation programme at Glan Clwyd Hospital offers a broad variety of teaching and experience to UK and overseas graduates looking to lay the foundations of medical practice within a safe, structured learning environment. Our rotations offer general and sub-specialty medicine and surgery in a district general hospital as well as opportunities in primary care, emergency medicine and specialty areas such as dermatology, psychiatry, paediatrics and more. We have well-received academic posts and a friendly and experienced postgraduate team offering superlative pastoral care and support. Our trainees and trainers are valued, developed and supported. We offer a structured, protected teaching program mapped and tailored to the Foundation Curriculum. We proactively deliver portfolio support and offer advice and guidance on safe and effective reflection, developing an interest in teaching/management and applying for your next job.

At YGC, we understand that clinical service must be balanced with effective training and we take our responsibility for developing excellent doctors very seriously indeed. Our team has an excellent understanding of training standards and expectations and the use of formal and informal feedback to improve the quality of service and training environments. Your voice will be heard here!

North Wales Clinical School

The North Wales Clinical School (NWCS) provides high quality educational facilities for Medical Students on placement in North Wales. The NWCS has grown both in stature and capacity over the last decade and welcomes approximately 250 medical students per year to Glan Clwyd Hospital.

Fantastic Doctors' Mess

A well stocked and comfortable mess is located on the ground floor of Glan Clwyd Hospital. It is a popular facility as somewhere to go and relax and grab a snack or drink.

Glan Clwyd Hospital Accommodation

- All our accommodation is on site and within a few minutes' walk from the main hospital itself
- Single/Family accommodation is provided, but please note that there is limited couples accommodation available
- Within our singles accommodation, we provide own furnished bedrooms within a flat that houses a maximum of three persons. Within the flat the three occupants would share facilities (kitchens/bathrooms). Please note we do not have en-suite facilities. Domestic service is provided weekdays but not weekend nor Bank Holiday periods. Couples accommodation is fully self-contained. Also within the residential complex is a laundrette with ample self-dosing washing machines and dryers
- Parking is available outside the accommodation buildings
- Contact Jenny Burns – Tel No 01745 583910 Ext 7342 or via email Jenny.Burns@wales.nhs.uk

Testimonial – Dr Jamie Lau

I have thoroughly enjoyed my time working at YGC. Friendly colleagues and a supportive working environment ensure that you will always have someone to turn to whenever you need help. There are always plenty of learning opportunities to expand your skillset which seniors are more than happy to supervise and teach. Teaching and research are something which you can get heavily involved in. My personal favourite is participating in the SEREN network, a project designed to help sixth form students apply to medical school.

Geographically, being in North Wales means Snowdonia is right at your doorstep whilst also being a short commute to Liverpool, Manchester, and Chester. Ensuring that there is always something to do in your spare time.

Overall working at YGC has provided me with an unforgettable experience and perfect skills for the foundation of my medical career.

Testimonial – Dr Abbey Rogers

Working at YGC provides a unique opportunity to become part of a tightly knit DGH community. The rural area not only provides an opportunity to explore The Great Outdoors, but also exposes you to a diverse patient population.

North Wales has so much to offer. From stunning beaches to the peaks of Snowdonia, there is so much on offer. A typical social might be a barbecue and bonfire on the beach, or a trek up Tryfan. However, if city life is more for you, Chester is on your doorstep and Liverpool not far away. And yes you can have dominoes delivered to the hospital. The key thing that differentiates YGC from other hospitals has to be the postgraduate department. For many of us, the continuous guidance and support from the postgrad family evolves into true friendship. I have had a brilliant kick start to my career in this hospital and the lifestyle that has accompanied the job has given me an incredible year of happy memories.

Discover North Wales

Glan Clwyd Hospital is situated in the centre of the North Wales countryside at the coast. Access by mainline train or road to Merseyside, Greater Manchester and the Midlands is straightforward, together with ferry to Dublin from the port of Holyhead.

The A55 North Wales expressway provides access between the main hospital sites and on to the national motorway network.

The historic city of Chester can be reached within 30 minutes and the cities of Manchester and Liverpool are one hour away. Both of these have international airports. Rhyl railway station is on the main London-Holyhead line with a direct journey to London of 3 hours.

North Wales is the Adrenaline Capital of the UK

Velocity

Velocity is the fastest zip line in the world. Soar over Penryn Quarry, where you can travel at speeds of up to and over 100 mph while taking in unbeatable views of Snowdonia

Educational & Clinical Supervisors:	Dr S Shrikanth

Speciality	Emergency Medicine
Programmes:	FP/26
<p>Description of placement</p> <p>The department is staffed with a mixture of Consultants, SAS Doctors (24/7 middle grade rota in operation) and juniors. In addition, there is a strong nursing team including ENPs, extended scope physiotherapists and an evolving team of Advanced Nurse Practitioners. Our department is part of a new build Emergency Quadrant, completed just over 5 years ago, future proofed to deal with an annual attendance of</p>	

70,000. The Emergency Quadrant includes an acute medical unit, surgical assessment unit, and a co-located GP OOH unit. We last year enhanced our model of care through the development of a Same Day Emergency Care (SDEC) unit for ambulatory cases, which is now supported by a full-time acute physician. This joint medical and surgical unit was the first of its kind in Wales, and helped attract national attention for the innovative way in which we had joined these teams, and developed new pathways from ED. We are planning to augment our service with the addition of a frailty unit and a GP admissions area

Educational Meetings:	Weekly F1 teaching, Thursday, 1:00– 2:00 Weekly Clinical Conference, Wednesdays, 1:00 – 2:00 Weekly E M teaching

Educational & Clinical Supervisors:	<p>AES Mr S. Sohrabi</p> <p>CS on call vascular consultants</p>

Specialty	Acute Medical Unit
Programmes:	FP/31
Description of placement	<p>The Dept of Acute Medicine comprises 4 Consultant Physicians of whom 2 do acute medicine and diabetes/ Endo and one does acute medicine and renal medicine. There is an associated specialist who covers review patients three days a week. There is ambulatory care area, DVT service and ADTT service attached to the unit.</p> <p>The department serves Central North Wales with a catchments population of 250,000.</p> <p>There are F1 and F2 attached to the unit. They will be involved with the generic clerking of patients being admitted and the ongoing care of the patients in the unit till they transferred to the other medical wards.</p>

The overall educational objectives of the F1 /F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to

- Take a history and examine a patient
- Identify and synthesize problems
- Prescribe safely
- Keep an accurate and relevant medical record
- Manage time and clinical priorities effectively
- Communicate effectively with patients, relatives and colleagues
- Use evidence, guidelines and audit to benefit patient care
- Act in a professional manner at all times
- Cope with ethical and legal issues which occur during the management of patients with general medical problems
- Educate patients effectively

Become life-long learners and teachers

Educational Meetings:	<p>Weekly F1 teaching – Thursdays – 1 :00– 2:00</p> <p>Weekly Clinical Conference – Wednesday 1:00 – 2:00</p> <p>Weekly Physicians’ Round – Fridays 11:30-12:30</p>
Educational & Clinical Supervisors:	Dr G Sreemantula

Specialty	Otolaryngology/Oral and maxillo-facial surgery
Programmes:	LFP/122
<p>Description of placement</p> <p>This will account for 1 day per week (GP surgery will contact you to tell you which day you will be working there - if you have not heard from them get in touch with them). This usually starts a few weeks after starting FY1. If you complete your LIFT day at Clarence Medical Centre, you will get the opportunity to see patients from the</p>	

emergency list and discuss them with the duty GP of the day. You will be taught how to use the systems and get a lot of advice from the GPs and GP registrars there.

ENT/Maxillo-Facial Surgery

This rotation usually starts with ENT for 2 months followed by 2 months of maxillofacial surgery. Contact Tracy the surgical co-ordinator for the change-over dates.

ENT:

- Mainly helping the SHO on-call.
- Junior team typically includes yourself (FY1), an FY2, 1-2 SHOs.
- Be on WARD 5 for handover at 8am and registrar ward round.
- Ward round will typically involve ward patients as well as going to see any ENT patients in the paediatric ward/emergency department.
- Typical jobs from ward round – bloods, cannulas, referrals
- There is also an ENT SHO clinic – some telephone calls and some face-to-face appointments for review/micro suctioning etc. – a good way to get CBDs/CEXs done.
- Every Friday there is a paediatric POAC (pre-operative assessment clinic) – this is usually the FY2s responsibility, but you may be required to assist/cover.
- Speak to the registrars/consultants if you want any time in theatre.
- WORKING HOURS: Monday – Friday 8am-4pm (excluding GP LIFT Day)

Maxillo-Facial Surgery:

- Working with the DCTs (dental core trainees – typically only dentally trained), staff grades (typically only dentally trained), registrars/consultants (dual dental and medically trained)
- The max-fax team will provide you with a rota (let them know when you LIFT days is)
- I would advise changing into green theatre scrubs in the morning – these are in the theatre changing rooms on the ground floor.
- You will spend time helping the DCT on-call, assisting in theatre, assisting in MOPS (minor operations) or in clinic.
- Helping DCT on call:
 - o Be at max-fax outpatients for 8am for handover.
 - o Typical day - AM ward round + jobs (bloods, cannulas, discharge letters),

helping with bleeps/reviewing patients, helping in any emergency theatre.

- Assisting in theatre:

- o Be at DOSA before 8am and ensure the patients have stickered consent forms, open any recent OPG (orthopantomogram – dental XR), drug chart written with TEDs prescribed.

- Assisting in MOPS

- o Typically, with staff grade, usually starts at 9am
- o They will teach you how to suture properly – good for getting a DOPS.

- Clinic

- o Usually starts at 9am
- o Led by consultant – they will give you patients to see and discuss.

Educational Meetings:

Weekly F1 teaching – Thursdays – 1 :00– 2:00
 Weekly Clinical Conference – Wednesday 1:00 – 2:00
 Weekly Physicians’ Round – Fridays 11:30-12:30
 Monthly Medical Governance meeting – 2nd Tuesday of the Month at 13:00

Educational & Clinical Supervisors:

Mr Richard Anthony & Miss Emma Woolley

Specialty	General Internal Medicine/Geriatric Medicine
Programmes:	LFP/129 & FP/028
Description of placement Ward 2	

It is a 24-bedded Care of the Elderly ward where the trainee would receive a wide ranging experience in managing elderly patients with acute and chronic medical problems, discussing diagnoses, management and prognosis with families, developing experience in pharmaco-therapeutics, prescribing and de-prescribing, participating in complex discharge planning and engaging in end of life discussions and other ethical scenarios.

The trainee would develop experience in working with the multidisciplinary team (MDT).

They would also do on-call for acute medicine.

There are two consultants and the team is supported by a registrar, internal medicine trainee, GPVTS trainee and a FY1 trainee.

Both consultants do regular wards rounds and there is a consultant presence every working day morning. The trainee would participate in consultant-led and independent ward rounds.

They would also get opportunities to teach fourth and fifth year medical students. Participation in quality improvement, audit and other projects will be highly encouraged.

Excellent teaching opportunities are provided in COTE and there will be opportunities for presenting at the different educational forums.

<p>Educational Meetings:</p>	<p>Weekly F1 teaching – Wednesdays – 2 – 3pm Weekly clinical conference – Wednesday 1 – 2pm Weekly Physicians’ Round – Fridays 11:30-12:30 Monthly Medical Governance meeting – 2nd Tuesday of the Month at 13:00 Weekly COTE teaching Mondays at 12:00</p>

Foundation year 2 Rotations

Specialty	Paediatrics
Programmes:	FP/26 & LFP/129
Description of placement	
<p>FY2 doctors participate in the Tier 1, 1:10 Full shift, and General Paediatric rota.</p> <p>Assessment and management of acutely unwell children presenting to children's ward / CAU. Including initiation of management. Attendance at clinic sessions, including sub-specialties. Regular attendance at departmental and hospital /foundation teaching sessions. Time spent on neonatal unit, including baby checks.</p> <p>During the placement, the foundation doctor would be expected to:</p> <ul style="list-style-type: none"> i) Develop skills in recognising and treating a sick child. This will be demonstrated by increasing independence in initiation of appropriate early management, and can be further shown through completion of SLEs - specifically Mini-CEX and CBD. ii) Build on already established practical skills, learning to apply these skills to children and young people. Specific practical skills will include: Airway care including simple adjuncts, Blood culture (peripheral), IV Cannulation, IV infusion including prescription of fluids, Perform and interpret an ECG, Perform and interpret peak flow, Urethral catheterisation (male), Venepuncture. This will be demonstrated through the use of DOPS. iii) Develop an understanding of common infective conditions such as bronchilitis, URTI, LRTI, gastroenteritis and sepsis. Demonstrate through reflective accounts progress made in treating these conditions and application to future patients. <p>Main duties of placement Attendance on ward rounds, admission / assessment of acute referrals, review of ward attendance patients, attendance as observer in clinics, taking blood in morning phlebotomy sessions, review and follow-up of results, effective delivery of handover.</p>	
Educational Meetings:	Weekly F2 teaching, Wednesday 2 – 3pm Weekly Clinical Conference, Wednesdays 1 – 2pm Daily teaching after handover/ during ward rounds

Educational & Clinical Supervisors:	Dr Ingley & Dr M Sandman (Educational and Clinical) Consultants of the week –clinical supervisors
-------------------------------------	--

Specialty	General Internal Medicine/Geriatric Medicine
------------------	---

Programmes:	FP/26
-------------	--------------

Description of placement

The Trainee will work on ward 14 which is the Stroke ward. They will do their own daily ward rounds as well as attending a consultant ward round at least twice a week. They will be expected to perform all the required ward work for their patients and will at times be required to talk to families. They can also participate in the Stroke Thrombolysis calls that come up 9-5 and at times will see and clerk direct Stroke admissions to ward 14.

They will be expected to attend all the below teaching as well as participate in presenting at the Medical Grand Rounds as well as the Monday COTE teaching. Weekly MDTs are also held on ward 14 which they can attend and there is a monthly Stroke Governance meeting that they are encouraged to attend.

They will work on the medical on call rota including weekends and nights. This will involve the medical take, dealing with all acute medical admissions and attending post take ward rounds and handovers. They will also provide medical cover for the wards out of hours. While on call they will also attend cardiac arrest calls. While on call they will always have Registrar support.

They will be supporting two consultants on ward 14 who both do Medical on calls as well as their Stroke work. This means at times there will be outlying general medical and COTE patients that they will need to look after on other wards (with direct consultant support). Both consultants also have community beds and if desired by the trainee they can spend some time with the consultants when they attend their community hospitals.

Educational Meetings:	<p>Weekly F2 teaching – Wednesdays – 2 – 3pm</p> <p>Weekly clinical conference – Wednesday 1 – 2pm</p> <p>Weekly Physicians’ Round – Fridays 11:30-12:30</p> <p>Monthly Medical Governance meeting – 2nd Tuesday of the Month at 13:00</p> <p>Weekly COTE teaching Mondays at 12:00</p>

-------------------------------------	-----------------

Specialty	General Practice
------------------	-------------------------

Programmes:	FP/26
-------------	--------------

Description of placement:

Clarence Medical Centre, Rhyl - www.clarencemedicalrhyl.co.uk

We are a large training practice in a seaside town in North Wales serving around 17,000 patients from a wide demographic. The practice has a long history dating back to 1850. We are based on two sites – one main site in the town centre close to West Rhyl which has most deprivation and a second branch practice (Ty Elan) in the quieter Eastern area serving more elderly people with complex medical conditions. We serve some 15 nursing and residential homes as well as many older people living alone with little support. We also offer an online consultation (PATCHS) <https://patches.ai/practice/clarencemedicalrhyl/>.

Research projects are always taking place at Clarence Medical Centre. This is thanks to the research team who plan the projects, GP's, Nurses, HCA's and most of all the patients who take part in the trials. We encourage and support anyone who is wanting be part of our research projects. Finding new and effective treatments for many different medical conditions.

There are often educational meetings during lunchtime throughout the week as well as a monthly training afternoon. The educational sessions and training are logged on the Timetree app [Login - TimeTree \(timetreeapp.com\)](http://Login - TimeTree (timetreeapp.com)), this allows everyone to see if there is anything booked and they can attend if they wish.

The induction process – On arrival they will be greeted by their supervisor, given a tour of the Practice, introduced to staff members, shown fire exits, where to find the emergency oxygen, defibrillator. In addition they are sent a digital induction pack which contains a vast amount of information within it (staff direct contact information, referrals, read codes, parking, information on local organisations and more).

A rota is made and sent to the trainee 2 week upon arrival with opportunities to sit in with varied members of the clinical team, covering areas such as Asthma / COPD, Diabetes, Nursing care, childhood Immunisations, Minor operations, a mixture of GP's, ANP's and Residential Home ward rounds. If there is an area they wish to cover that has not been added, we will introduce this where possible. Once own clinical sessions are taking place, templates are adjusted to ease them into Practice. A GP is allocated to the trainee each day so that they receive full support for the duration of their placement. We are a large research Practice in North Wales so we included this within the placement – they are fully supported by a GP, ANP and the rest of the research team.

If any group training session have been organised for the Practice, they will be offered to attend.

Weekly tutorials are provided with a GP, group tutorials have also been introduced (separate tutorials are given if preferred).

Main duties:

Clinical sessions to see patients in General Practice – with an allocated GP to provide supervision and support for each session. Home visits as required.

Educational Meetings:

Weekly F2 teaching, Wednesdays, 2 -3pm
Weekly Clinical Conference – Wednesday 1 – 2pm
One to one teaching

Educational & Clinical Supervisors:

Dr Eve Blakemore, Dr Simon Dobson, Dr Martika Mann, Dr Selena Harris & Dr Ben Lane

Speciality

Emergency Medicine

Programmes:

FP/25 & FP/029

Description of placement

The department is staffed with a mixture of Consultants, SAS Doctors (24/7 middle grade rota in operation) and juniors. In addition, there is a strong nursing team including ENPs, extended scope physiotherapists and an evolving team of Advanced Nurse Practitioners. Our department is part of a new build Emergency Quadrant, completed just over 5 years ago, future proofed to deal with an annual attendance of 70,000. The Emergency Quadrant includes an acute medical unit, surgical assessment unit, and a co-located GP OOH unit. We last year enhanced our model of care through the development of a Same Day Emergency Care (SDEC) unit for ambulatory cases, which is now supported by a full-time acute physician. This joint medical and surgical unit was the first of its kind in Wales, and helped attract national attention for the innovative way in which we had joined these teams, and developed new pathways from ED. We are planning to augment our service with the addition of a frailty unit and a GP admissions area

Educational Meetings:

Weekly F2 teaching – Wednesdays – 2 – 3pm
Weekly clinical conference – Wednesday 1 – 2pm
Weekly Emergency Medicine teaching

Educational & Clinical Supervisors:	Dr Jennifer Dinsdale & Dr Tom O’Driscoll

Educational Meetings:	<p>Weekly F2 teaching, Wednesdays, 2 -3pm</p> <p>Weekly Clinical Conference, Wednesdays 1 – 2pm</p> <p>Weekly Surgical Teaching Friday 8-9am</p>
Educational & Clinical Supervisors:	Mr Sheik Rehman

Specialty	General Internal Medicine/Respiratory Medicine
Programmes:	FP/29
<p>Description of placement</p> <p>Ward 11</p> <p>F2 post in Respiratory medicine and general medicine on call rota. The Respiratory ward has 24 beds including 4 NIV beds. There are 2 respiratory teams on the ward to cover these beds each made up of 1 respiratory consultant, 1 respiratory registrar, an F2 or IMT and 1 F1. There are daily board rounds at the start of each weekday which are led by consultants but junior medical staff participate in. Consultant ward rounds occur twice a week and a registrar ward round once a week. The F2 is expected to attend the ward rounds, present patients, participate in education on the ward round and co-ordinate subsequent investigations, collection of results and complete discharge summaries. The F2 is also expected along with the F1 to complete 2 ward rounds each week. Consultants attend the ward daily in the afternoon to discuss cases and results. In addition to NIV the ward also has high flow nasal oxygen and an Ultrasound machine giving opportunities to learn about their use in respiratory medicine. In addition to the ward there is the possibility of attending both general respiratory clinics and specialty clinics including difficult asthma, lung cancer, pleural, ILD, COPD and bronchiectasis. There is also the opportunity to attend one of 2 procedure lists each week and gain exposure to EBUS and thoracoscopy in addition to Bronchoscopy. The F2 participates in the general medical on call rota in a F2 slot. This includes ward cover and seeing patients on a non selected take. The F2's work weekdays, weekends and nights. Consultant ward rounds occurs twice daily to review patient seen by junior medical staff. The respiratory department has an educational departmental meeting every Monday and the F1 will take part in a rota to present cases/topics</p>	
Educational Meetings:	<p>Weekly F2 teaching – Wednesdays – 2 – 3pm</p> <p>Weekly clinical conference – Wednesday 1 – 2pm</p> <p>Weekly Physicians' Round – Fridays 11:30-12:30</p> <p>Monthly Medical Governance meeting – 2nd Tuesday of the Month at 13:00</p> <p>Weekly Respiratory Teaching</p>

Academic Rotation

PROGRAMME: SFP-Other/30

3 vacancies

- **Intensive Care Medicine – Dr J Glen, Glan Clwyd Hospital**
- **Respiratory Medicine – Dr D Menzies, Glan Clwyd Hospital**
- **General Practice – Dr S Dobson, Clarence Medical Centre, Rhyl**

General Information:

Three days per week will be spent undertaking traditional training rotating through the specialities above. Two protected and defined days per week will be dedicated to a combination of specialised research and teaching. We would encourage you to contact us early to discuss the post, in particular the research elements.

In Intensive Care you will be working as part of the ICU team, including out of hours work.

Teaching

One day per week will be spent in the North Wales Clinical School, Glan Clwyd hospital. You will assist in delivering the undergraduate curriculum for medical students in year 3, 4 and 5 from Cardiff and Manchester medical schools. You will support a full-time specialist registrar grade teaching fellow that is already in post, and the remainder of the undergraduate team. Duties will include ward-based teaching, simulation training, facilitation of tutorials and development of undergraduate training materials.

You will also lead and deliver our Widening Access to Medicine Programme, in collaboration with the Welsh Government Seren Network which is established in our region. This important programme supports students from local state schools in their application for medical school. You will be responsible for ensuring that the programme is delivered. The programme includes interview practice, UCAT preparation, small group work, essay, and work experience during July (COVID permitting). By applying for this post, you are committing to this voluntary and altruistic activity, which takes place over 16 evenings during the academic year – all Wednesdays, from 1700-1930. There are three of you, so there can be an element of self-rostering of cover for each evening. Your specific responsibilities will include:

- Publicising the programme to your colleagues so that sufficient faculty are available each week (we need 8 faculty members each week, made up of doctors of all grades and medical students).
- Publicising the programme to school students at the welcome event.
- Providing training to volunteer faculty (don't worry we will train you first!).
- Timetabling and communications with faculty and students.
- Running and troubleshooting each session (on Teams or in person depending on the COVID situation).
- Ensuring that an essay is marked and returned.
- Participating in the delivery of the work experience week in July.
-

The actual programme and materials already exist, but there may be a requirement to update them as the years go by, and you will be involved in this too.

You will be really well supported in this activity by Dr Glen, Dr Menzies, and by the clinical school – but it is a genuine and serious responsibility so if it doesn't appeal, please do not apply for the post.

Research

One day per week will be devoted to research. The area of research will depend on your individual circumstances and interests. The health board will **fully fund an MRes** within the Clinical Specialised Pathway Framework within the Institute of Health and Medical Research at Bangor University for you. This includes allocation of a clinical and a specialised supervisor, access to modular research training as dictated by your current level of knowledge and training, and support to submit your thesis.

In addition to undertaking and MRes by research, the following research and audit opportunities exist:

- Integration into the Clinical Trials unit at Glan Clwyd hospital
- Participation in both non-commercial and commercial trials currently recruiting on our site
- GCP training if needed
- Support from the clinical audit department

The choice of MRes project will be determined by your interests but possible examples include:

- Evaluation of the impact of a secondary care smoking cessation service on the health and wellbeing of patients admitted to hospital
- Morbidity and mortality associated with suspected and confirmed pulmonary embolism
- Impact of mepoluzimab on asthma patients in a secondary care asthma service
- Utility of a dedicated pleural disease database in secondary care and outcomes of thoracoscopy

Specialty**Intensive Care Medicine**

Programmes:

SFP/030

Description of placement

In ICU, you will be involved in the care of critically ill patients, under supervision. We offer the full range of standard intensive care treatments including invasive ventilation, inotropic support, renal replacement therapy, and intraortic balloon counterpulsation. Our 13-bedded unit is in the North Wales Cardiac Arrest Centre, which means that we have close relations with our interventional cardiology colleagues. You will have opportunities to learn invasive vascular access (central lines, arterial lines, dialysis lines), as well as ultrasound: we have 2 FUSIC mentors in the unit. You will get used to managing sick patients, and learn to present complex patients succinctly – a key skill for any clinician who wishes to be taken seriously.

You will attend our weekly multi-disciplinary meeting, monthly M&M, monthly Clinical Governance meetings, and Journal Club. You will be expected to present at Journal Club and at M&M. You will also attend regular anaesthesia and ICM teaching.

Finally, you will have an opportunity to work with our outreach team, learning to recognise and stabilise the acutely deteriorating patient.

The information that follows is based on the experience of one of the 2020-21 trainees the end of their academic FY2 year, and has been updated for 2022-23 academic year.

Intensive Care Unit (First floor)

- 08:30 – 17:00. Morning handover is at 08:30 (DON'T BE LATE!). Most people change into scrubs beforehand, ask someone to point you in the direction of the theatre changing rooms to collect them.
- Each day there is a consultant led ward round in the morning, so get stuck in and review patients using the proforma.
- Afternoons are for doing the jobs, reviewing new admissions, and seeing patients on the wards
- Anaesthetics ICU teaching programme monthly but ask questions any time.
- There is a separate ICU induction document – this on a smartphone app and will be sent to you.
- There are plenty of opportunities to do procedures like arterial lines if you would like to.
- You'll be added to the ICU Medics WhatsApp group, which will contain everyone on ICU and will have useful information shared in it.
- Two consultants cover ITU during the week (daytime)

- Junior team during the day varies but is generally 2 middle grades (SpR or trust grade) plus a mix of other grades including you.
- You be part of the ICU team. You will be well supported. There will always be a higher ICU grade present. You are expected to review patients on the unit, attend emergency calls and get involved as much as you can.
- During your ICU placement you will contribute to out of hours work, including nights. You will be well supported in this by 3 other doctors: two anaesthetists (who also cover theatre and obstetrics), and a third doctor with ICU experience. If bad things are happening out of hours the consultant will generally be there.
- We will ensure that out of hours working does not impact on your other commitments, but flexibility will be needed on both sides.

Educational Meetings:	Weekly F2 teaching, Wednesdays, 2 – 3pm Weekly ICU MDT, Tuesdays 2-3pm Hospital clinical conference Wednesdays 1-2pm M&M, 2 nd Tue of month, 17 :30 Lecture series, 3 rd Tue of month, 17:30 Clinical Governance, 4 th Tue of month, 17:30 Local and regional anaesthesia/ICU teaching - timetabled
Educational & Clinical Supervisors:	Dr John Glen

Specialty	General Practice
Programmes:	SFP/30
<p>Description of placement</p> <p>You will be working closely within a dynamic, multi-disciplinary primary care team in Rhyl and get the opportunity to experience the full spectrum of care in the community. You will be supported in developing your communication and clinical management skills by consulting patients in a mixture of acute clinics, routine surgeries and home visits. There is huge scope to learn about the broader aspects of primary care, for example, through spending time with chronic disease and Paediatric nurses, working alongside our Advanced Paramedic and getting involved with our dedicated primary care research team. You will also attend regular in-house educational meeting, Respiratory MDTs and have the opportunity to learn about primary care management. The practice hosts placements for medical students from Cardiff, Liverpool and Manchester, and you would be encouraged to become involved in supporting their learning.</p> <p>You need to be at FY2 teaching from 2-3pm on Wednesday PM so bear this in mind when on GP as there is a 15 minute drive to/from the Postgraduate centre.</p> <p>KEY INFO Clarence Medical Centre, Rhyl - www.clarencemedicalrhyl.co.uk</p> <p>We are a large training practice in a seaside town in North Wales serving around 17,000 patients from a wide demographic. The practice has a long history dating back to 1850. We are based on two sites – one main site in the town centre close to West Rhyl which has most deprivation and a second branch practice (Ty Elan) in the quieter Eastern area serving more elderly people with complex medical conditions. We serve some 15 nursing and residential homes as well as many older people living alone with little support. We also offer an online consultation (PATCHS) https://patchs.ai/practice/clarencemedicalrhyl/.</p> <p>Research projects are always taking place at Clarence Medical Centre. This is thanks to the research team who plan the projects, GP's, Nurses, HCA's and most of all the patients who take part in the trials. We encourage and support anyone who is wanting be part of our research projects. Finding new and effective treatments for many different medical conditions.</p> <p>There are often educational meetings during lunchtime throughout the week as well as a monthly training afternoon. The educational sessions and training are logged on the Timetree app Login - TimeTree (timetreeapp.com), this allows everyone to see if there is anything booked and they can attend if they wish.</p>

Description of placement

Respiratory Ward 6

Welcome to the academic foundation year two programme at Ysbyty Glan Clwyd (YGC). This job involves Intensive Care, Respiratory Medicine & General Practice over three four-month rotations, plus an ongoing researching & teaching commitment.

In respiratory you will join our established team of 5 consultants, and junior doctors on the respiratory ward. The ward contains a 4 bed nurse-led NIV unit with provision for treatment with nasal high flow oxygen. You will gain exposure to and experience in treatment of a variety of respiratory conditions, including COPD, asthma, ILD, pneumonia, pleural disease (including drain management), lung cancer, and (of course) COVID. The team is supported by a number of dedicated respiratory nurse specialists, a ward based ANP, an integrated research team, and a teaching and interventional respiratory fellow who you will work alongside.

There are dedicated clinics in COPD, difficult asthma, lung cancer, pleural disease, ILD and bronchiectasis as well as general respiratory clinics which you are welcome to attend. You are also welcome to attend our weekly lung cancer MDT and radiology meeting and to take part in the weekly departmental educational meeting.

There are twice weekly procedure lists undertaken which you can attend and learn the basics of interventional bronchoscopy (including EBUS and endobronchial valve insertion), thoracoscopy and chest drain/indwelling pleural catheter management.

Throughout the year you will spend: three days per week working as part of the clinical teams; one day per week completing a Masters by Research (MRes) with Bangor University; & one day a week in the North Wales Clinical School (NWCS).

In order to finish the year you need to complete exactly the same FY2 competencies as your full-time clinical colleagues.

The information in this document is based on the experience of one of the current trainees the end of their academic FY2 year.

KEY INFO

Clinical Days

Three days per week. Typically Wednesday, Thursday, Friday but negotiable with secretaries/supervisors/teams. You need to be at FY2 teaching from 2-3pm on Wednesday PM so bear this in mind when on GP as there is a 15 minute drive to/from the Postgraduate centre.

Respiratory (Ward 11)

- 8.45 – 5 pm. MDT board round at 8:45 each morning
- Two speciality registrars, one CMT/LAT SHO, two FY2s (including you!) & two FY1 doctors.
- The consultants cover the ward on a rotating pattern for 1 month each.
- The team is supported by a ward NIV nurse, smoking cessation practitioner, and a PA

- The medical rota co-ordinator will not have your name down on their rota as technically you are supernumerary. You will not have any on-call commitments but can choose to work locum shifts.

Resp teaching/meeting Monday lunchtimes (go even if you're not on the ward that day)

Educational Meetings:

Weekly Physicians' Round
Weekly F2 teaching – Wednesdays – 2 – 3pm
Weekly clinical conference – Wednesday 1 – 2pm
Weekly Physicians' Round – Fridays 11:30-12:30
Monthly Medical Governance meeting – 2nd Tuesday of the Month at 13:00
Weekly COTE teaching Mondays at 12:00

Educational & Clinical Supervisors:

Dr Daniel Menzies

Opportunities for F2 trainees to become involved in Simulation Training program within YGC. This aspect of the post will be based within the team in the North Wales Clinical School with opportunities for involvement in the delivery of training to medical students, Physician's Associates and other medical and nursing staff.

This is particularly relevant given the changes to the 2021 Foundation curriculum intended to enhance simulation training opportunities for those on the programme.

Specialty	Community Paediatrics
Programmes:	SFP/031
<p>Description of Placement</p> <p>The community paediatrics service has 6 WTE permanent members of staff based in Rhyl and Colwyn Bay. We support many of our most vulnerable young people and their families – including those who attend our special schools (many of whom have complex neurodisability e.g. Autistic Spectrum, Cerebral Palsy, Down Syndrome), supporting young people who are in care: Looked After Children (LAC) or are in the process of being adopted. We have special roles in children's safeguarding: completing child protection medicals, while also supporting health professionals with complex safeguarding cases and working closely with social workers and children's services to ensure we meet the health needs of young people who are in care. We have very strong relationships with education and schools, ensuring that young people have the appropriate help and support to reach their educational potential. We also support children with specialist continence needs.</p> <p>FY2s will be offered a comprehensive 6 week induction – this will include sitting in at a variety of our clinics and specialist school clinics. There will be opportunity to observe a child protection case conference, and if appropriate observe a fostering or adoption panel. Trainee will spend time in our Child Development Centre, including observing sessions in the classroom / joint assessments with the speech therapists / early years specialist nursing team. Trainees will all spend ½ to 1 day each with a variety of therapists including: speech therapist, occupational therapy, portage, school nurse, health visitor, paediatric dietitian, physiotherapist. They will spend time with the neurodevelopmental team and have the opportunity to follow a neurodevelopmental assessment and observe their MDT.</p> <p>In the 2nd 6 weeks, trainees will have the opportunity to work side-by-side in clinics with a permanent member of the team, taking histories, examining children and under appropriate supervision, developing and initiating clinical management plans. This will give trainees the opportunity to develop clinic skills alongside formulating clinic letters and management plans.</p>	
Educational Meetings:	Weekly meeting with named supervisor Weekly- lunchtime educational meeting over zoom
