Cardiff and Vale
University Health Board

Cardiff and Vale University Local Health Board Foundation Programme Year 1

What makes Cardiff so great!

Cardiff is a unique city that offers all that is expected of any modern capital city, and boasts an enviable quality of life. Cardiff's residents believe it is one of the best cities in Europe to live and work in.

Compact, multicultural Cardiff dances to its own beat, with abundant cultural and historical sights, independent businesses and a friendly atmosphere. - Amy Pay, Lonely Planet Writer

Cardiff is a "city of parks" with more green space per person than any other main UK city and has been described as the epitome of cool by the Lonely Planet guide. There is a vibrant night life including the hustle and bustle of St Mary Street and the relaxed restaurants and bars of Cardiff Bay.

The City offers a mix of boutique stores found in the varied Victorian arcades coupled with larger department stores. Cardiff is home to world class venues and international events; the Principality Stadium is recognised across the world, the Sophia Gardens Stadium hosts international cricket including the Ashes and Cricket World Cup whilst the Wales Millennium Centre has established a worldwide reputation as an excellent arts and cultural venue.

Cardiff enjoys a healthy residential market, yet the cost of housing is lower than many other parts of the UK. Schools offer a high standard of education and facilities. The UHB's Accommodation Department will offer help and support to new trainees seeking to relocate to the City. Surrounded by areas of outstanding natural beauty, with the Brecon Beacons National Park, Swansea Gower Peninsula and the picturesque Vale of Glamorgan all nearby, Cardiff really does have it all.

Why work in Cardiff & Vale UHB?

The UHB has a well-earned reputation as a centre of excellence for clinical care, medical education and research. Established in 2009, following the reorganisation of health services within Wales the UHB is one of the largest and most diverse healthcare providers in the UK. There are strong links with the Wales College of Medicine and Cardiff University.

Working for CAV UHB

It is important to the UHB that all staff are as happy as possible with their working arrangements. Therefore there is a commitment to improving the working environment and enabling all staff to strike a healthy work-life balance.

The Social Club on the UHW site provides facilities for relaxation and exercise with gym, pool and racquet sports available. There is an active doctor's mess at both UHW and UHL, with widescreen television, comfortable seating and facilities for refreshments. Accommodation is available if required at both the UHW and UHL sites.

The Foundation Programme in CAV UHB

The majority of foundation posts are based either at the University Hospital of Wales (UHW) or University Hospital Llandough (UHL). On both sites there are Medical Education Centres with helpful and knowledgeable staff readily available to provide support and advice throughout your Foundation years.

There is a comprehensive induction programme organised for the start of your post and the Foundation Programme Directors meet with all foundation trainees to welcome you to the UHB and ensure that you are supported at this stage of your career. There are regular opportunities for feedback and should there be any difficulties encountered during your posts it is easy to obtain help. The teaching programme has always received positive feedback and allows plenty of time for you to learn. It is designed to cover all elements of the Foundation Programme Curriculum and is continually being evaluated in order to improve the standard of education provided.

University Hospital of Wales (UHW)

The University Hospital of Wales is a large teaching hospital situated within the city of Cardiff. Working here as a foundation trainee will enable you to learn from some of the foremost clinicians in their fields within a culture of innovation, education and research. The hospital provides secondary care to the population of North and East Cardiff and tertiary level care in nephrology, neurosciences, haematology, paediatrics and neonatology, cardiothoracics and critical care. Most of the posts are busy and provide good experience in developing clinical assessment and decision making skills within a supportive team environment.

The Medical Education Centre at UHW is based in the purpose built Cochrane Building that is also home to Cardiff University Health Library and Medical School. The Centre has excellent educational facilities and an active postgraduate education programme.

Departmental meetings are highly valued by trainees both as opportunities to learn and to gain experience in presenting their own work.

The strong links with Cardiff University mean that there are good opportunities for research and further academic development if wished. There are a number of academic foundation posts which are specifically aimed at encouraging teaching and research activity during the programme.

University Hospital Llandough (UHL)

Located at Penarth in the Vale of Glamorgan, the University Hospital Llandough provides medical secondary care services to West Cardiff and the Vale of Glamorgan. It is also home to the Cardiff and Vale Orthopaedic Centre (CAVOC), which provides elective orthopaedic services and tertiary respiratory services including cystic fibrosis service. The hospital is supported by excellent lung physiology, state of the art thoracic radiology and pathology services. A new endoscopy unit has recently opened which provides state of the art facilities for gastroenterology endoscopic procedures and interventional respiratory medicine including advanced bronchoscopy techniques and thoracoscopy.

The Medical Education Centre at UHL houses excellent library and educational facilities with an active postgraduate education programme and newly developed “simulation” suite.

Rookwood

Rookwood Hospital is situated in Llandaff in North Cardiff; approximately 2 miles from the University Hospital of Wales. The site has been used for over 100 years; after WW1 it was converted from a convalescent home into a rehabilitation hospital for paraplegic servicemen. The Welsh spinal injuries rehabilitation centre, regional neuro rehabilitation unit, Artificial Limb and Appliance Service, The Electronic Assistive Technology Service, Headway (brain injury charity), South Wales Mobility and Driving Assessment Service and several specialist neurology outpatient clinics (e.g. Multiple sclerosis, Motor neuron disease, Dementia, Parkinson's) as well as some out-patient gerontology services are based at Rookwood Hospital.

Marie Curie Hospice

Marie Curie Hospice Cardiff and the Vale is situated in Penarth, Vale of Glamorgan, approximately 2 miles from University Hospital Llandough. It is set on a cliff top with spectacular views over the Bristol Channel, this purpose-built hospice provides 28 inpatient beds based over 2 wards serving the population of Cardiff and the Vale of Glamorgan. It also houses a day therapy unit and the Marie Curie community palliative care team who provide advice and support for patients living with a terminal illness in the Vale of Glamorgan area.

Rotations

August 2021 - July 2022

FP/56		Educational Meetings
<p>General Medicine/Respiratory University Hospital of Wales (On-calls in University Hospital Llandough) Band 1B</p> <p>Educational Supervisor Prof B Hope-Gill Clinical Supervisor Prof B Hope-Gill</p>	<p>The post is based on ward B7 at UHW with on-call in UHL. B7 includes the inpatient care of a broad range of respiratory and general medicine cases. Particular experience in managing non-invasive ventilation can be obtained in the ward-based acute NIV Unit in addition to ITU stepdown patients; including patients with tracheostomies. There is good opportunity to gain experience in undertaking pleural procedures such as pleural aspiration under USS guidance and also potentially chest drain insertion.</p> <p>The post would suit somebody who would thrive in a busy clinical environment with a high turnover of patients and is keen to gain experience of managing patients with high levels of acuity. On-calls are in UHL, supervision is by the acute and on-call physicians.</p>	<p>Local Foundation Team F1 teaching sessions (Monthly, Thursday pm).</p> <p>Medicine at 13:00, Monday. UHW Grand Round at 12:45, Wednesday. Respiratory radiology meeting Tuesday 12:45, weekly. Departmental teaching Friday 12:30, weekly.</p>
<p>General Surgery/HPB University Hospital of Wales Band 1B</p> <p>Educational Supervisor Mr N Kumar Clinical Supervisor Mr N Kumar</p>	<p>This post is in the Cardiff Liver Unit which provides tertiary care to patients with liver surgical problems in South Wales. There are 3 consultant surgeons, clinical fellow, SpR, F2 and three F1s in this unit. There is a Clinical Nurse Specialist (CNS) for liver cancers. All the consultants do general surgical take and hence there will be a mixture of general and Hepatopancreatobiliary patients in the ward. This is a busy firm, there is at least a daily consultant ward round. This posting will provide an opportunity to learn management of complex problems in a systematic way. We have arrangements in the General surgery directorate to get additional help from other F1s as needed. On-call is part of the general surgical rota.</p>	<p>Local Foundation Team F1 teaching sessions (Monthly, Thursday pm).</p> <p>Monthly General Surgery Q & S meeting. Weekly teaching ward rounds. UHW Grand Round at 12:45, Wednesday.</p>
<p>Emergency Medicine University Hospital of Wales Unbanded</p> <p>Educational Supervisor Dr S Allen Clinical Supervisors Dr S Allen & duty consultants</p>	<p>The Emergency Unit experience includes the whole breadth of adult and paediatric patients presenting from relatively minor injuries to critically unwell victims of major trauma. We also see the medically unwell and those suffering mental illness. The environment promotes judicious use of diagnostic acumen and investigations.</p> <p>Procedural skills such as joint reduction can be learnt and with direct consultant supervision, leadership of cardiac arrest and trauma teams can be practiced.</p>	<p>Local Foundation Team F1 teaching sessions (Monthly, Thursday pm).</p> <p>UHW Grand Round at 12:45, Wednesday. Daily teaching, 12:00 weekdays. Structured EU teaching every 2 weeks. Monthly Q&S Meeting, Wednesday morning, including M&M.</p>
