This event is being recorded

This event will last 60 minutes

Please keep your cameras on and your mics on mute

Please use 'raise hand' or chat bar for questions

Aims of session

- Re-introduce the Rehabilitation Framework
- Define Value Based Outcomes
- Opportunity to hear about successful use of value based outcomes
- Consider how we can improve value?

POLICY AND STRATEGY

Rehabilitation: a framework for continuity and recovery 2020 to 2021

A framework to help organisations plan rehabilitation services following the coronavirus pandemic.

Mentimeter

Rehabilitation framework

| | |
|-------------------------------|---|
| POPULATION 1 | People post Covid-19: those recovering from extended time in critical care and hospital and those with prolonged symptoms of Covid-19 recovering in the community |
| POPULATION 2 | People awaiting paused urgent and routine planned care who have further deterioration in their function |
| POPULATION 3 | People avoiding accessing services during the pandemic who are now at risk of harm e.g. disability and ill-health |
| POPULATION 4 | Socially isolated/shielded groups where the lockdown is leading to decreased levels of activity and social connectivity, altered consumption of food, substance misuse, the loss of physical and mental wellbeing and thus increased health risk |

Value based outcome

- Focus on delivering outcomes for people over process targets/financial measures
- Social return on investment rather than cost effectiveness

Value based outcome

- VBHC - Equitable, sustainable and transparent use of the available resources to achieve better outcomes and experiences for every person (Hurst et al, 2019)
- Better data
- Better evidence
- Multi-disciplinary engagement

**David Hughes MBE, Clinical Lead and Manager – Podiatry,
Orthotic, MCAS and Persistent Pain services, SBUH**

**Amanda Atkinson, Head of Paediatric Occupational
Therapy, SBUHB**

Value based outcomes in practice

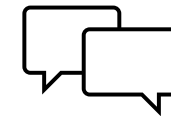

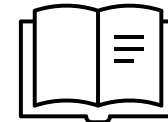

Mentimeter/Jamboard and group discussion
